Stylish Monkey

Great sound but much noise, crack in quiet moment...Its the same for everybody? Not a very very clean pressing.

Road.to sliver

A little noisy but my copy is OK after cleaning.

blac wolf

What's the difference between the higher priced silver and the lower priced? They seem exactly the same with slightly different track order... but same look, same numbers made...

Goll

Just that, track order. Dunno what else it could be.

I love Mercedes

Quite the well done work they have done on this release. For being a movie soundtrack record and a very colorful one at that its fairly well pressed and mastered. Not outstanding but a step above expectations. I doubt other fans out there will be disappointing with the effort made here. Im so glad they did not use the horrible movie cover for the jacket sleeve as well. The movie should really have done something similar in style. Equipment used: Rega RP1 with base carbon cart Cyrus 2 amplifier System Fidelity SF5030 tower speakers Custom made HQ speaker cables

Jeb

I cleaned mine on an Okki Nokki and its only little crackles sometimes, not too much. But not perfect.

Lbe

criminologue Great sound but much noise, crack in quiet moment...Its the same for everybody? Not a very clean pressing... Ill listen again sometime and check.

Yla

Great sound but much noise, crack, pop in quiet moment...Its the same for everybody? The sound is great but its not a very clean pressing (factory problem?)...

Question: does anyone know where was the signed version available?

Mora

I saw a signed copy on Amazon for \$100. Everywhere else is sold out

Xava

The signed version is officially sold out on Milan's website.

Dont_Wory

I was looking for it myself, missed it, was a promo for the distribution company. I got mine through Mondo, they did not offer

them. <http://shop.artistarena.com/the-witch-signed-original-soundtrack-vinyl-bundle.html>

Itiannta

it was available for pre-order from the artistarena.com webshop in early March

Zainian

One of the coolest-looking wax combos I've ever seen. I was expecting a dull gray and black marble, but it's legitimately silver and shiny.

Golden freddi

I agree, the album is gorgeous, and the sound quality is pristine. I owned this since May when it first released on Mondo, with silly plans to keep it sealed to see if it went up in price... it did briefly, then fell back down to below what it originally sold for! So tonight I finally opened it for the first time to enjoy it as it should be.

Manarius

Subtle in its eerie seductiveness, this soundtrack will trap your senses in fog and dark as you're helplessly led to the horrifying chants and cacophony of a witches' coven. An amazingly designed cover (showcasing Black Phillip in all his glory) houses the beautiful "silver starburst" colored record that looks and feels like it was melted from an evil night sky. Definitely recommend spinning this in the dark as you lie there and wait until a small woodland critter comes to escort you naked through the woods.
